The rise of media Streaming has accelerated the downfall of industry DVD rental companies such as Blockbuster. In July 2015 an article from the New York Times published an article about Netflix's DVD service. It stated that Netflix is continuing their DVD service with 5.3 million subscribers, which is a significant drop from the previous year. On the other hand, their Streaming service has 65 million members. In a recent 2020 study assessing the impact of Ebook Streaming over traditional DVD Ebook Rental it was found that respondents do not purchase DVD Ebooks nearly as much anymore, if ever, as Streaming has taken over the market. They can be ripped from BD25 or BD50 discs (or UHD Blu-ray at higher resolutions). BDRips are from a Blu-ray disc and encoded to a lower resolution from its source (i.e. 1080p to 720p/576p/480p). A BRRip is an already encoded video at an HD resolution (manually 1080p) that is then transcoded to a SD resolution. Watch living at the movies by jim carroll Ebook BD/BRRip in DVDRip resolution looks better, regardless, because the encode is from a higher quality source. BRRips are only from an HD resolution to a SD resolution whereas BDRips can go from 2160p to 1080p, etc as long as they go downward in resolution of the source disc. Watch living at the movies by jim carroll Ebook Full BDRip is not a transcode and can fluxate downward for encoding, but BRRip can only go down to SD resolutions as they are transcoded. BD/BRRips in DVDRip resolutions can vary between x264 or x265 codecs

(commonly 700 MB and 1.5 GB in size as well as larger DVD5 or DVD9:4.5GB or 8.4GB), size fluctuates depending on length and quality of releases, but the higher the size the more likely they contain the x264 codec.
